

Response	Are You Familiar with Shakespeares works and way of writing?	Is the following Text written by Shakespeare or not?	(Bigrams)In your Opinion, How much does the following text sound as written by Shakespeare:	(Trigrams)In your Opinion, How much does the following text sound as written by Shakespeare: to	(Quadgrams)In your Opinion, How much does the following text sound as written by Shakespeare: to	Country	City	Written Feedback
76733	Partially	This is exactly him	Not too much	Half Half	Almost Completely	Spain	Madrid	I thought that the more questions I did, the more the text resembled Him, Why is this?
76786	Yes I am Confident in My Knowledge	This is exactly him	Not at All	Not too much	Half Half	Luxembourg	Luxembourg	I Studied a lot of Shakespeare in School and even though some people may not understand his writing style, I do, and none of the texts after the first question sounded like him
76798	I would Recognize It if I read it	This is exactly him	Half Half	Half Half	Almost Completely	Spain	Madrid	I believe the text generator did accurately work to an extent but slightly misses grammar and context
76805	Yes I am Confident in My Knowledge	Kind of	Almost Completely	Completely	Completely	Spain	Madrid	Very Impressed! The text sounded like it was extracted from one of his plays but it was actually just generated text very nice
76809	Yes I am Confident in My Knowledge	This is exactly him	Not at All	Not at All	Half Half	Luxembourg	Luxembourg	The Shakespearean text generator vastly lacks grammatical sense and I found it hard to follow the sentences
76828	Partially	This is exactly him	Not too much	Half Half	Almost Completely	Spain	Madrid	From what I read it seems the bigram generation was the least accurate to Shakespeares writing but had some of him in it whereas the quadgram generation started to capture him much better
76834	I would Recognize It if I read it	This is exactly him	Half Half	Almost Completely	Completely	Spain	Madrid	This generator works very well with quadgrams likely due to the probabilities of the next words being lessened since there aren't many different possibilities for 4 consecutive words, well done!
